The Hongkong cricket season is just around the corner and rivalry is once again expected to be very keen among the various teams. As at the beginning of every previous season, there are bound to be this year a number of new faces and of course, many of the old ones too.

CONDITIONS

DULL

LONDON

London, Aug. 28. Generally dull conditions developed in markets today and there was a further contraction in the value of business.

Selling was quite small but the recent strong buying which brought last week's upsurge in prices appeared to have almost completely dried up.

Centred

Interest continued to be centred largely on hire purchase finance, banking and stores shares all of which lost ground on expectations that competition for consumer credit business will intensify further.

Gilt-edged held up well despite the patienty of business and the failure of the twelve millions 5½ per cent Kent issue.

Foreign bonds and rails attracted little attention.

Dollar stocks were mixed.

Accentuated

Industrials drifted lower on small selling accentituted by the latest reports from the industry of further redundancies and a possibility of a deterioration in labour relations following the rejection of the engineering employers' wage offer.

No decided trend developed in off shares which closed irregular.

Rubbers and teas were quiet. Gold shares opened casier and closed with numerous falls.

Copper shares reflected lower metal prices and other base metals were neglected, -Reuter,
